

My and I enjoy XM satellite radio every waking minute of the day. We also now benefit from the weather and traffic reports that are provided to us when we travel and need to know time sensitive information. XM provides a convenient single source for the entertainment and information we desire everyday. The world is full of changes everyday that make our lives easier and more fulfilling. HR 4026 is just another way for those opposed to these kinds of changes to allow special interest groups and outdated materials to continue to impede progress in our daily lives. We are VERY opposed to HR 4026.
